

SILICA RESOURCES
A U S T R A L I A

Travis Landells, Machinery Operator

When did you start at SRA? I started in March 2025. Previous to that, my family and I lived in Mount Isa. After four years of living in Mount Isa, we wanted to make the switch to the Cassowary Coast for the lifestyle. I was then fortunate to get the job with SRA. My wife and I have two boys aged 6 and 3 years old and another one due any day now.

What do you love about living in the Cassowary Coast? How easy it is to go and do different things such as visiting a waterfall or going fishing. We moved to the Cassowary Coast for the great lifestyle the region offers. My eldest boy is now in prep and we plan to raise our family here.

What did you do before SRA? I'm a chef by trade. But as a chef, the split shifts, nights and weekend work were not very family friendly. So I changed careers and in 2021 I went into mining.

What surprised you most when you moved to sand mining? The process – it is very different to other mining processes. Before starting with SRA I didn't know the process was to create a wet slurry with the sand to clean it and sort it. I also didn't know how many every-day products silica sand goes into.

What do you love most about your job at SRA? I really love being around the site crew and seeing something created from the beginning. I've been able to see the start of the process and building the site and plant from scratch.

What's a surprising fact about you? Since 2019 my family and I have live in the Northern Territory, Victoria, New South Wales and Queensland

Favourite sports? Cricket and motorbike racing.
