

**SILICA RESOURCES
AUSTRALIA**

Public Meeting

- Thursday 26th November 2026
- 6:00pm
- Kurrimine Beach Progress Hall
919 Murdering Point Rd,
Kurrimine Beach

Meeting Purpose

Silica Resources Australia (SRA) invites all community members to a public meeting to hear from representatives on planned operations and to ask questions.

The agenda for the meeting is on the reverse side of this notice and will include information on the commitment to publicly release the dust monitoring data, interpreted by Dr Keith Adam¹ and the dust monitoring sites.

Representatives from Ports North will also be in attendance to answer questions related to the Port of Mourilyan.

Complimentary light refreshments will be provided.

Register for the meeting and submit questions

We encourage all attendees to register and submit their questions in advance using the QR code below. This helps with catering and also in ensuring the presentation is tailored to the questions you want answered.

We ask that questions are submitted by Wednesday 11th November 2026 to provide the team with enough notice to prepare written responses.

Responses to questions and meeting transcript will be public on the website

The written responses to questions will be provided as a handout at the meeting and will also be on the SRA website under 'News and Updates'. In addition, the audio of the meeting will be recorded and a transcript of the meeting will be provided on the SRA website under 'News and Updates' within a week of the public meeting.

www.silicareources.com.au/news-and-updates/

The website contains comprehensive project information and an FAQ section which is regularly updated.

¹ Silica Resources Australia has engaged Dr Keith Adam, a Senior Specialist in Occupational and Environmental Medicine, based in Queensland. Dr Adam was a member of an Expert Working Group (EWG) established by the Australian Centres for Disease Control to update the "National guidance for doctors assessing workers exposed to respirable crystalline silica".

About Us

Silica Resources Australia (SRA) is a public, unlisted company that is fully independent and 100% Australian owned. SRA was formed specifically to be the owner of the Mourilyan Silica Project (at Stephenson Road, Kurrimine Beach) and is developing multiple silica opportunities in Australia including an advanced high purity silica project to produce 5N + HPS.
